PROFILE

Cloud & DevOps Engineer with 4.6+ years of experience designing and automating scalable AWS infrastructure and Kubernetes platforms. Skilled in Terraform, EKS, CI/CD, and DevSecOps practices. Reduced deployment time by 45% and cloud costs by 40% through automation, security integration, and reliability improvements. Seeking DevOps/SRE/Platform Engineering roles focused on highly available and secure systems.

TECHNICAL SKILLS

- **AWS:** EC2, VPC, IAM, EKS, ALB/NLB, Route53, RDS, ACM, CloudWatch
- **DevOps:** Terraform, Jenkins, Docker, Kubernetes, Ansible
- **DevSecOps:** SonarQube, Trivy, Gitleaks
- **Monitoring:** Prometheus, Grafana
- **Scripting/OS:** Bash, Linux, Python
- **Version Control/DB:** Git, GitHub, MongoDB, MySQL

WORK EXPERIENCE

Cloud & DevOps Engineer | Tata Consultancy Services (TCS) | Mumbai, India

June 2021 - Present

- Automated CI/CD pipelines using Jenkins, reducing deployment time by 40% and eliminating manual releases
- Provisioned AWS infrastructure using Terraform (VPC, EKS, RDS, ALB, IAM), enabling consistent multi-environment deployments
- Designed and managed production-grade EKS clusters with autoscaling, ingress controllers, persistent storage, and secrets management
- Containerized applications using Docker and deployed to Kubernetes for scalable, highly available workloads
- Implemented Route53 weighted and failover routing, improving uptime by 25%
- Automated server configuration using Ansible and Bash scripts, saving ~10+ hours/week of manual effort
- Integrated Prometheus, Grafana, and CloudWatch for proactive monitoring and alerting
- Optimized cloud utilization through right-sizing and Reserved Instances, reducing costs by ~40%

KEY PROJECTS

DevSecOps Platform on AWS

- Designed and deployed a production-grade DevSecOps ecosystem on EKS using Terraform and Jenkins.
- Built secure CI pipelines with secret detection (Gitleaks), vulnerability scanning (Trivy), and code quality gates (SonarQube).
- Automated Docker image builds, security scans, and Kubernetes deployments.
- Implemented Prometheus & Grafana dashboards for real-time application and infrastructure monitoring.
- Enforced RBAC, namespace isolation, and Kubernetes security best practices.

Kubernetes Platform Support & Reliability

- Provided L2/L3 operational support for Jenkins, GitHub, SonarQube, and Grafana hosted on Kubernetes.
- Diagnosed pod failures using logs, probes, and resource metrics; resolved OOM, networking, and scheduling issues.
- Performed root cause analysis and implemented preventive fixes, reducing incident resolution time by 40%.
- Documented troubleshooting playbooks to improve team efficiency and reliability.

CERTIFICATIONS

- AWS Certified Developer - Associate (2024)
- AWS Certified Cloud Practitioner (2023)

EDUCATION

- Bachelor of Engineering (ENTC) - Shah & Anchor Engineering College, Mumbai
Ranked 2nd in Department
